

Exercise 1: Personal Experience

To be done individually

Due Tuesday 20 August

Briefly (about one paragraph) describe a recent time when you or someone you know were fooled by a false post or news article. What was the content of the article, the surrounding context of the issue, the platform on which it was shared? Why do you think you or the other person believed it was true? How did you or the other person identify it as false, and how did you or the other person react to learning this?

Please post your response (about one paragraph, including a optional screenshot) on Moodle / Telegram.

You should not spend a large amount of time (say, max. 30 minutes) on this assignment.
